One For All - All For One

With **SYSTEM-M**, you won't own a regular knife.

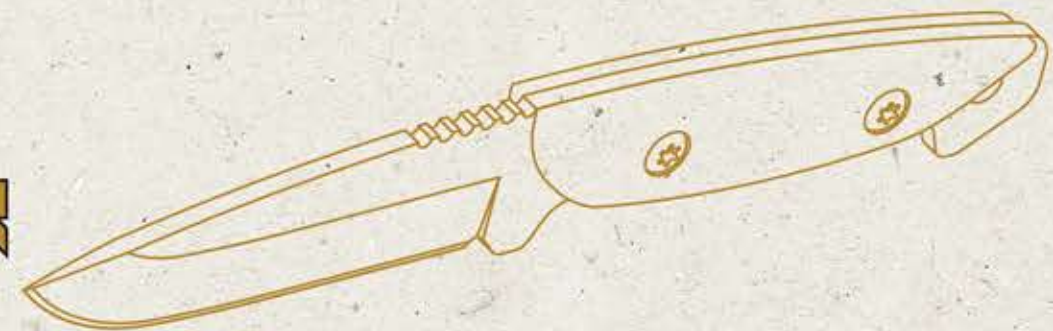

You will own a tool that you can make unlimited changes according to **your needs and style**.

The world's first and only system that unifies all models under a modular interchangeable roof.

All **SYSTEM-M** models use compatible;

- **Monotype Ergonomic Handle Grip**
- **Monotype Screw set**
- **Monotype Handle**

One For All - All For One

It is very easy to assemble/disassemble the screws and grips of your **SYSTEM-M** series knife.

You can replace the screws and handles of your knives with different types, colors and materials as you wish.

With **SYSTEM-M**, you don't have to use the same blade all the time. You can add a new look to your knife by simply replacing your handles and/or screws.

Since the handles and screws are **compatible with all models**; You do not need different handles and screws for different models, **you can combine** all handles and screws with any model you want.

# FLAT BEVEL

## HUNTING / CAMPING / SURVIVAL / SELF DEFENCE

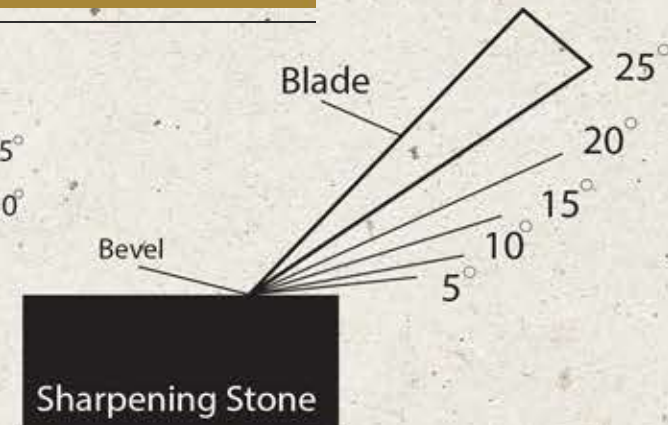

Correct Bevel Choice for High Cutting ability, Durable and Long-Lasting Blades

## SHARPENING GAUGE

- Heavy Duty, Cleavers and chopping knives 25° 20° 15°
- Outdoor, Camping and folding knives 20° 15° 10°
- Kitchen, Fillet and pairing knives 10° 5°

SYSTEM-M Blades have been sharpened exactly at 20° with CNC Machining process

**Perfect Bevel and Sharpening with CNC Machining Process**

## MULTI-STAGE

## QUALITY CONTROL

All equipments are checked for quality at every stage of our **mass production processes.**

Thanks to our traceable quality control system, perfect equipment in terms of materials and workmanship.

The world's most comprehensive warranty terms in equipment manufacturing.

Visit our site for warranty terms

<https://turqgear.com/warranty/>

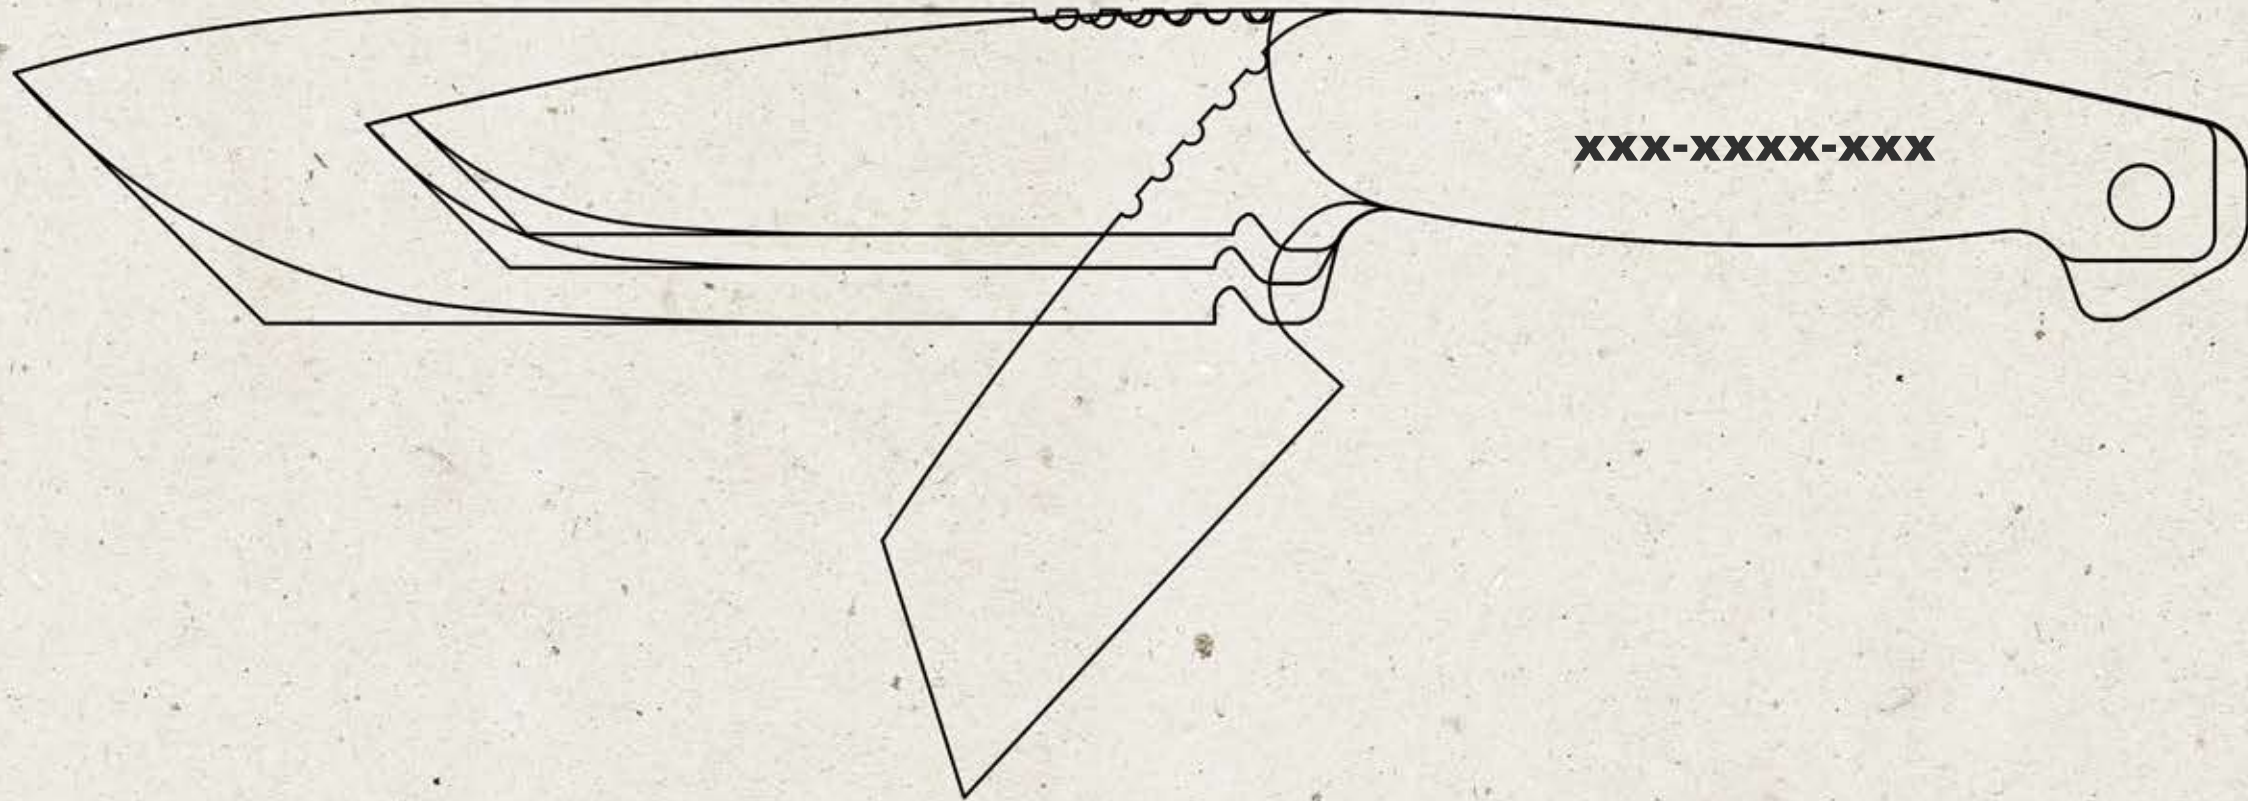

## HIGH HARDNESS

Heat treatment in special vacuum furnaces

Highest and Optimum Hardness Levels depending on the steel grade

Compliance with quality standards; TS EN ISO 6508-1 (ASTM E18) , TS EN ISO 6892-1 (ASTM A370) , ASTM E1019, ASTM E1077

## 'Unique ID' System

**EACH 'SYSTEM-M' KNIFE IS GIVEN A UNIQUE SERIAL NUMBER**

You can find the 'Unique ID' of your Knife; under the handles, on the label and prospectus.

**SUPERIOR TRACKING SYSTEM FOR ALL PRODUCTION PROCESSES**

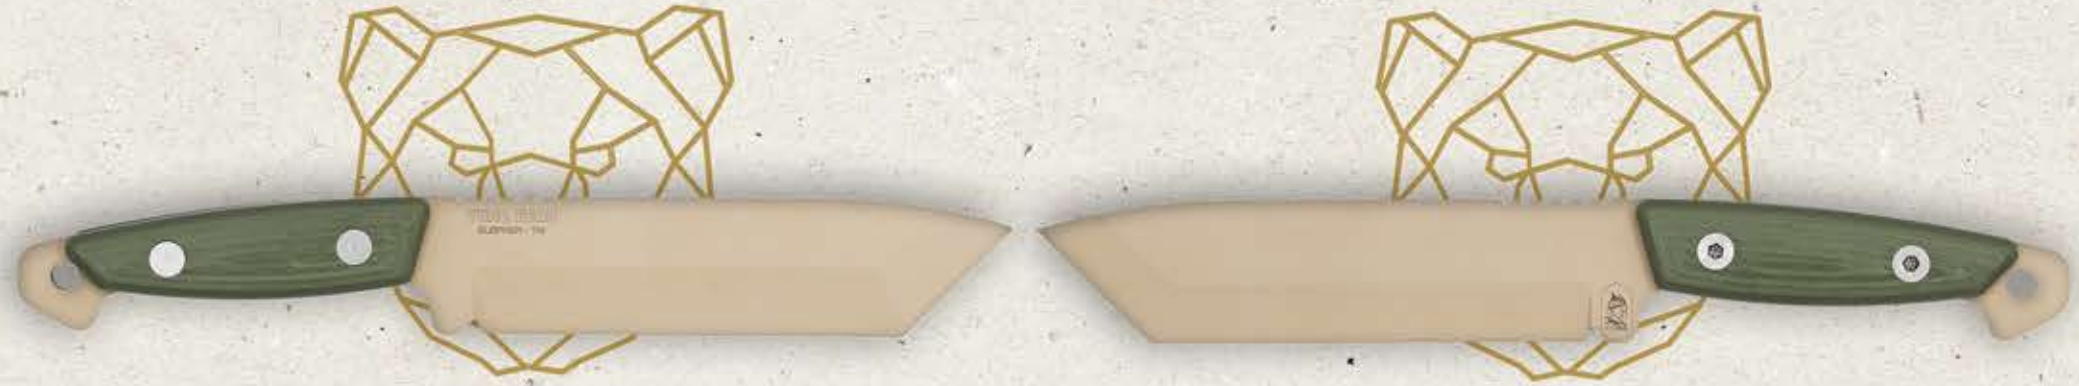

Thanks to our 'Unique ID' system, all of the 'SYSTEM-M' knives and all their components are tracked in all processes from raw material to user.

---	+	+	+	---	+	+	+	---
---	+	+	+	---	+	+	+	---
---	+	+	+	---	+	+	+	---

We know that the eco-friendly approach starts in the design process.

For this reason, we have a basic policy that we follow while designing, engineering and manufacturing our products.

**“WE DO NOT MANUFACTURE INDUSTRIAL DUMP !”**

What does this policy mean?

First of all, we design and manufacture our products **“MADE-TO-LAST”** . By keeping our R&D and testing process at the highest level, we make permanent designs, not temporary designs to be changed continuously. In this way, we prevent designs that will turn into garbage after a while or create a need for recycling.

Secondly, we do not ship garbage to our users. Unfortunately, many products in the world produce tons of garbage until they reach the end user. For example; cardboard boxes of products are mostly used for pre-sale storage and shipping. When the product meets the end user, it goes to waste. Many of these boxes are not recycled or incur cost even if recycled.

So why do we do this?

We prefer not to make nature pay for the cost of the boxes, but undertake it ourselves. The knife boxes we designed as Turq Gear do not only serve the purpose of pre-sales storage and transportation. Considering that our users need to protect their various belongings (phone, charger, personal belongings, etc.) against impacts and splashes in nature, we have produced boxes that they will use constantly, not throw away.

In this way, a Turq Gear knife user both buys more than one product, a storage box along with the knife, and contributes to recycling.
